Subject: Letter of recommendation

Dear Ameritek,

About a month ago we bought a house. We got a surprise visit from a young man to setup a water testing. I said sure what do I have to loose? A couple of days later your representative Dick showed us what hard water can do. I have never heard of hard water before, I thought water was water and all the same! I did think the water filter system was a bit pricey at first, but after adding up the 7 year supply of products it evened out. So far I'm happy with my choice of installing this to my home. I drink much more water now that it's easily available to me, no more having to go to the store for bottles!

My daughter is 8 ½ months old and with this weather she gets heat rashes, but her bumps are clearing up since we have started bathing her with the filtered water. My skin feels much softer which means I don't have to apply as much lotion. I do have to say that my husband doesn't like that, he says he doesn't feel like a man having smooth skin. :)

Overall, we are satisfied with the system.

Thank you and have a wonderful day!

Laura Mendoza
