

To whom it may concern:

June 17, 2010

I purchased a General Ionics water softener/conditioner in 1978. The Water Company has been servicing this system since they were founded. Julio has kept this unit working properly and has done a great job of notifying me when service was required. I have been totally satisfied with the service performed on my system. Julio is a registered pharmacist and is very knowledgeable about water quality and the effects on our health.

Julio helped us evaluate the various systems available and recommended that we recondition our existing system. My system is now 32 years old and has been reconditioned to work like new at a significantly lower price than purchasing a new system. I would certainly recommend that anyone who is considering purchasing a water system consider purchasing from The Water Company. I am sure that they will be as happy with the product, service and maintenance as I have been.
